Objective

ML/AI engineering or research internship, Summer 2027 — LLM systems: RAG, agents, evals; low-resource multilingual NLP.

Education

City University of Hong Kong — BSc Computer Science Hong Kong SAR · 2026–2030
Full scholarship recipient; Tiger/Talents Program
- Relevant coursework: Linear Algebra; Probability & Statistics; Data Structures; Algorithms *(in progress)*

Nazarbayev Intellectual School of Science and Mathematics — High School Diploma Taraz, Kazakhstan · 2020–2026
GPA 4.78/5.00 · SAT 1520 (Math 800, Verbal 720) · IELTS 7.0
- A-Level : Mathematics A · Physics A* · Computer Science A*

Selected Awards

- **Bronze Medal**, International AI Olympiad (FAIO) 2025 — top 7.1% of 291+ participants; 100,000 KZT prize
- **Gold + 2× Bronze**, StemCo Global Sciences, Singapore 2025 — top 0.1% of 12,000+ participants
- **National Merit Scholarship**, BestYs — sole recipient in Kazakhstan ($2,000; 1,000+ applicants)
- **2× Gold**, StemCo International Science Olympiad 2024
- **Bronze**, 11th International Iranian Geometry Olympiad 2024 (1,245 participants); **Bronze**, Asian International Mathematical Olympiad (AIMO) 2024

Projects

LLM Agent Systems with Tool Use Python · Ollama · Claude API · FastAPI
github.com/nurasik14/OllamaSearch ·
- **OllamaSearch:** compared native model tool-calling against a custom web-search tool backed by a self-hosted SearXNG engine, evaluating answer quality, controllability and privacy of locally hosted LLMs

Kazakh–Russian–English Retrieval-Augmented Generation *(in progress)* Python · Hugging Face · Vector DB
[LINK TO REPO]
- Building retrieval-augmented QA over a trilingual corpus, comparing dense and hybrid retrieval and multilingual embedding models

Deep Q-Network Agent for Flappy Bird Python · PyTorch · Gymnasium
github.com/nurasik14/FlappyBird-RL
- Implemented Double DQN and Dueling DQN (following Jonny Code's tutorial series) with experience replay, target-network sync and ε-greedy decay
- Trained for 168,000+ episodes; best Double DQN run reached a mean reward of 53.1

Character AI with Long-Term Memory Python · LLMs · Embeddings
- Prototyped LLM-driven characters with an embedding-based memory store, so conversations can draw on earlier context

Hands-Free Cursor Control via Pose Estimation OpenCV · MediaPipe
- Explored computer-vision input for users with limited mobility, mapping detected body landmarks to cursor movement as a mouse alternative

Experience

AuaLine Almaty, Kazakhstan · Oct – Nov 2025
Frontend / Full-Stack Developer Intern
- Shipped and deployed the company's e-commerce site (product catalog, WhatsApp checkout flow, contact form) in a 5-week internship; responsive across desktop and mobile. TypeScript, Node.js, HTML/CSS

KBTU Data Camp — Finalist (48 h) Almaty, Kazakhstan · Jan 2025
- Modelled seismic time series around Kazakhstan with seasonality-aware preprocessing and LSTM networks to forecast earthquake occurrence

Leadership

- **Organizer, Turgor Olympiad** (Taraz, 2025) — ran the local mathematics olympiad; 30 student participants;

Skills

Languages: Python (advanced), TypeScript/JavaScript | **Spoken:** Russian (native),Kazakh (native),English (fluent)
ML / AI: PyTorch, HuggingFace, sklearn, NumPy, Pandas; LLM agents & tool calling, Ollama, Claude API, RAG, embeddings; DQN; OpenCV, MediaPipe
Engineering: Git, Docker, Linux, FastAPI, REST APIs, Playwright, React, Node.js, PostgreSQL
